

Tom Bio

As for job title, I currently hold two positions:

Program Manager Energy and Industry at Sohar Port and Freezone
Technical Advisor at Hydrom

Tom Bio

“About Tom Costa

Tom currently is the Program Manager Energy & Industry in Sohar Port and Freezone’s Strategic Affairs Department. In this capacity, he is developing strategies for the deployment of green hydrogen activities, integration of renewables with industrial processes and identifying and implementing synergies that promote the sustainability of industries within Sohar Port and Freezone.

Recently, Tom joined Hydrom to support the coordination of the development of green hydrogen projects in Oman and to promote the alignment with its various ports and Freezones .

A Chemical Engineer from the University of Groningen and MBA candidate at Warwick Business School, he has a strong background in industrial process optimization and energy efficiency combined with a firm belief that today, more than ever, industries must embrace the energy transition to survive in a changing global market.

Tom brings his passion and dedication to SOHAR to tackle some of the toughest industrial challenges, namely, how to decarbonize the industrial sector in Oman and reduce its dependency on fossil fuels. He is a strong advocate of innovation and integration of processes with renewables, constantly raising the bar, be it in exploring synergies, renewables, carbon capture and utilization and green hydrogen
